

KYOCERA
DMS LINK 4.0
FOR ENTERPRISE

AUTOMATE PAPER-INTENSIVE WORKFLOWS.

PROVIDE INDEXING, BARCODES, OCR AND STORAGE TO EXISTING SYSTEMS.

SEAMLESSLY LINK SELECT KYOCERA MFPS TO YOUR EXISTING DOCUMENT MANAGEMENT SYSTEM TO UNLOCK DIGITAL IMAGING, DISTRIBUTION, RETRIEVAL AND LONG TERM ARCHIVAL CAPABILITIES TO SEE TANGIBLE GAINS IN WORKFLOW AND WORKGROUP PRODUCTIVITY.

Research indicates that when an organization implements a electronic Document Management System (DMS), document-related costs can be significantly reduced. Not surprisingly, businesses have embraced DMS software solutions in order to realize measurable gains in productivity. In addition, due in part to certain regulatory compliance mandates, the costs and security risks associated with managing hardcopy are simply too high. Instead, documents are increasingly being transitioned into a digital document workflow. Whether for file sharing, storage, retrieval, security and/or compliance purposes, DMS solutions play a critical role in many corporations. As such, KYOCERA has developed a software application to automate paper-intensive environments – DMS Link 4.0 for Enterprise. DMS Link 4.0 for Enterprise enables a Scan-directly-to-DMS feature from the control panel of select KYOCERA MFPS, enabling access to an embedded application that facilitates the paper-to-digital conversion process.

HOW IT WORKS

With DMS Link 4.0 for Enterprise, your HyPAS-enabled KYOCERA MFP connects directly with your existing back-end Document Management System, with the capability to integrate with many well-known Enterprise Information Management (EIM) solutions, providing indexing, barcode recognition, optical character recognition (OCR) and Virtual PDF functionality. For Windows environments, your enterprise can create editable file types such as PDF, Word and Excel using the optional Optical Character Recognition powered by OmniPage® OCR. Its robust capability lets you fully extract content while preserving the format of each element, whether it is text, image or spreadsheet, thus saving you time and increasing productivity.

As a seamless on-ramp to your back-end document management system, DMS Link 4.0 for Enterprise is flexible enough to meet your document management needs. This powerful and scalable solution from KYOCERA helps every organization achieve maximum efficiency and enhanced ROI.

- > Access specific, pre-set workflows from select Kyocera MFP control panels.
- > Index documents for easy retrieval from your desktop.
- > Connect to an existing document management system or simply select a shared folder on the network.
- > Set specific and unique workflows per department and/or MFP

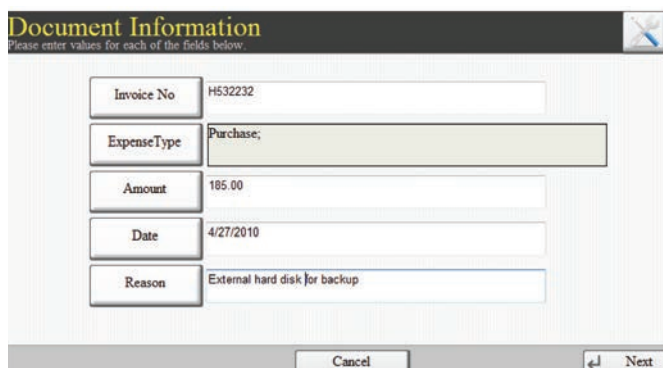

KYOCERA DMS LINK 4.0 FOR ENTERPRISE

HYPAS

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

(1.) Choose a destination at the MFP panel

(2.) KYOCERA MFP touch screen panel with sample index fields and data

HIGHLIGHTS

- › Easily implemented; users can scan documents directly to existing DMS folder structures
- › Access scanned images with the click of a button; enter index data at the MFP to create database records and store a link to the image files
- › Automate document indexing to minimize mis-filing errors
- › Save time when scanning with OCR which converts static text into searchable and editable content
- › Automatically recognize specific barcodes containing valuable index data, speeding up document conversion and storage
- › Group MFPs according to predefined workflow requirements – one workflow for accounting, another for purchasing – each can be unique
- › An embedded solution, for select KYOCERA MFPs, DMS Link 4.0 for Enterprise requires no additional middleware or server add-ons

AS EASY AS 1...2...3...

1. From the MFP touch screen control panel, the user browses to the target folder, for example, "Invoices," or "Purchase Orders," and then enters the required fields.
2. The scanned document is indexed based on the field entries (metadata), and then stored in the DMS database or shared network folder.
3. From a PC, the file can be viewed, printed, forwarded or archived. It's that easy.

SYSTEM REQUIREMENTS

- › Windows XP SP3 or later, Windows Vista S1 and Windows 7
- › Windows Server 2003 SP2 or later, Windows Server 2008 and 2008 R2)
- › Both 32 and 64 bit platforms are supported
- › Minimum CPU Requirement: 1 GHz Pentium or equivalent
- › Recommended RAM: at least 512 MB.
- › Free hard disk space required: 2 GB.
