

PINPOINT
SCAN™

ADVANCED SCANNING MADE SIMPLE.

NETWORK SCANNING AT THE TOUCH OF A BUTTON.

PINPOINT SCAN IS AN EASY TO INSTALL AND SIMPLE TO USE SCANNING APPLICATION THAT CREATES AN END-USER MANAGED PEER-TO-PEER SCANNING ENVIRONMENT, USING HYPAS-ENABLED NETWORK CONNECTED KYOCERA MFPS.

Scanning is a fundamental part of any organization's document workflow. The ability to scan directly to your PC or Mac, instead of scanning to an e-mail as an attachment, has long been an advantage of connected desktop scanners. However, having many individual scanners can be an overly expensive proposition. With KYOCERA's PinPoint Scan business application, powered by HyPAS, scanning to your PC or Mac from your network connected KYOCERA MFP transforms this digital workflow. It's as easy as scanning from a desktop scanner, but with the added speed and versatility KYOCERA MFPS provide. With a simple two step installation process, one to the MFP and one to your PC or Mac, network scanning couldn't be easier.

The straight forward computer side of PinPoint Scan allows you to create and manage your own pincode and scanning destinations, reducing the need for IT intervention. The scan destinations you set in your computer software become simple one-touch buttons on the MFP control panel. When you want to scan a document, all you have to do is access the PinPoint Scan application on your KYOCERA MFP, enter your pincode, select a destination and you are ready to go!

PinPoint Scan also protects your confidential documents since all communication between the MFP and computer is encrypted. You can also easily integrate with HID cards for an even more streamlined workflow experience and greater document security. Additionally, a single MFP license supports any number of user computers in the same network.

SIMPLY ENTER YOUR PERSONALLY DEFINED PINCODE AT THE MFP AND YOU CAN:

- › Scan to your desktop
- › Scan to a folder
- › Scan an attachment in a new email
- › Scan to a program that supports Adobe PDF files

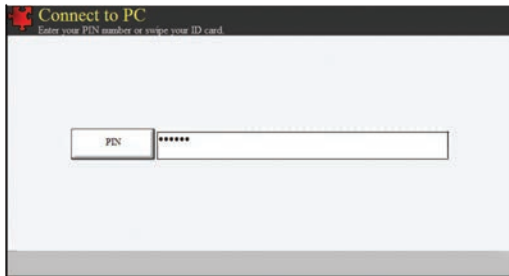

Scan directly to your PC Desktop, My Document folder, email application or any application that supports PDFs.

PINPOINT SCAN

HYPAS

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

(1) Enter your Pincode

(2) Select your destination

(3) Scan your documents

SYSTEM REQUIREMENTS

- › Network connected KYOCERA/Copystar MFP that is HyPAS enabled
- › PC application compatible with Microsoft® Windows 7/Vista/XP
- › Apple Mac application compatible with OS 10.5 or higher
- › License required per MFP
- › Application supports multiple PCs/Macs
- › Supported file format: PDF

HIGHLIGHTS

- › Quickly convert hardcopy documents into high-impact color or monochrome files, in universal PDF format
- › Route documents with easy user defined one-touch buttons
- › One time application installation on users' computer
- › Highly secure with pincode or optional proximity card protection, as well as SSL-encrypted communication
- › End user managed, reducing the need for IT intervention
- › Document history log enables users to see a list of all scanned documents, along with file location
- › Continuous scanning for higher volume environments

HOW IT WORKS

PC- or Mac-Side:

Setting up the computer side of PinPoint Scan is remarkably simple. Installation is a breeze and takes only moments with the assistance of a Wizard based installation guide. Once the software is installed, you create a personalized pincode and choose the Scan to destinations. By default, Desktop, e-mail (your default e-mail), and documents are all available from installation. Adding destinations is as simple as browsing to a desired folder or selecting a desired program like Adobe® Acrobat® or Photoshop®.

MFP Side:

Since PinPoint Scan resides as an Application on the MFP once installed, it is easily accessed by pressing the Application button on the control panel and then selecting PinPoint Scan. You enter the pincode you created using the utility software and PinPoint Scan rapidly searches the network to find your PC. A destination can then be selected followed by the Start button. If "Documents" is selected as the destination, PinPoint Scan allows you to browse to the desired folder and scan directly to it. In addition, you can select your desired scan settings before a document is sent. PinPoint Scan makes network scanning efficient and easy to use, all while saving you time and boosting productivity.
