Exact speed varies depending on the system configuration, software application, driver, and document complexity. ⁶ Exact speed varies depending on the system configuration, software application, driver and document complexity. ⁷ Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups. ⁸ HP recommends that the number of pages per month of imaged output be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period. ⁹ Program features and availability may vary by country. For more information, visit <http://www.hp.com/learn/suresupply> ¹⁰ Scan speeds measured from ADF.
